

APPENDIX F-410

QUARTERLY FSC COUNT OF SMA RECYCLING RECORDS

1. PURPOSE

To provide a quarterly count of recycling Supply Management Application (SMA) records which cause the generation of VRC VB (Management Data Required).

2. ORIGIN

a. This listing is produced as a result of counting quarterly those recycling records which still qualify for generation of VRC VB. The specific transactions which cause the count will print initially (VRC VB) on appendix F-441, Notification to Supply Operations. If not responded to, the same item will print again 90 days later under VRC VB. These recycled items are counted and summarized by FSC at the end of the quarter unless cleared before the quarterly programs are run.

b. Because the SMA will not mechanically generate a DIC ZRY until the DSC Catalog Management Data (CMD) has been established in the DLSC TIR, it is essential to avoid letting the VRC VB count grow. Each VB indicates that a delay has occurred in the establishing of a new item in the Supply Control and National Inventory Record files with a possible delay in effective supply support actions.

3. FREQUENCY

Quarterly.
